REPORT ON ZERO WASTE AWARENESS PROGRAMME

Eco Club of Jai Shriram Engineering college has organized Zero Waste Awareness Programme on 23.09.2023 which was aimed at promoting sustainable practices and raising awareness about waste reduction in our community. This event took place on 23.09.2023 at Pongalur and involved dedicated volunteers, community members, and passionate individuals who collectively contributed to its success. The primary objective of our Zero Waste Event was to educate the community about the importance of waste reduction, recycling, and responsible consumption. We have prepared informative pamphlets and flyers highlighting key concepts of zero waste living, recycling tips, and the detrimental effects of excessive waste generation on the environment. On the day of the event, volunteers distributed these pamphlets to passersby, shoppers, and event attendees to spread awareness and provide practical guidance for waste reduction. Our volunteers actively engaged with community members and event attendees to facilitate conversations about zero waste practices. They addressed questions, shared personal experiences, and provided advice on how individuals could make simple yet impactful changes in their daily lives to reduce waste.

Outcome of the Event:

- Distributed Pamphlets which contains zero waste management methods.
- Interacted with peoples and explained the tips for waste reduction in daily routine.
- community interactions provided valuable information and practical tips on composting, recycling, reducing single-use plastics, and upcycling.

Students Distributing pamphlets and interacting with the public
